

Iridium GO!

Global smartphone access from the world's leading satellite network provider.

A portable, lightweight unit designed to extend the reach of your devices with a satellite backed Wi-Fi hotspot.

Overview

Iridium GO! extends the connectivity of your mobile networks beyond the reach of terrestrial networks. Powered by the globe's most extensive satellite network, Iridium GO! transforms your smartphone, laptop or tablet into a global communications device. Iridium GO! is ideal for anyone on the move, by land or at sea, providing critical connectivity beyond the reach of terrestrial networks.

Iridium GO! is simple to use. Its integrated antenna and battery-powered unit allows fast connection to the Iridium LEO constellation to create an anywhere Wi-Fi hotspot within a 30.5 metre radius. Iridium GO! enables robust voice and data capabilities for your smartphone or up to five mobile devices.

- Voice calls
- Email access
- Applications
- Social networking
- Photo sharing
- SMS two-way
- GPS tracking
- SOS alert

Iridium GO! is a small, versatile device that's been designed to withstand the elements. It can be easily carried in a rucksack or mounted in land vehicles, aircraft or boats to enable a wide range of mobile applications.

With full compatibility with both iOS™ and Android™ operating systems, affordable plans and the ability to share multiple connections, Iridium GO! delivers a fast, flexible and affordable solution for global connectivity.

Details

Manufacturer:	• Iridium
Network:	• Iridium
Device Type:	• Hotspot
Markets:	• Offshore • Utility • Military • Tracking • Renewable • Oil and Gas

Technical Specs

Dimensions:

- 4.5" x 3.25" x 1.25"

Durability Specifications:

- MIL-STD 810F ruggedness
- IP65 rated

Easy to Use:

- Stable, lay-flat design
- Flip up antenna
- Built-in menu/ status bar

Flexible:

- Wi-Fi device ready
- App API for developers
- Robust Accessory platform
